10th | Senior Secondary Certificate from CBSE | Cum. Per: 91.2%

PROJECT(S)

FashionFusion | Live | Code
- Developed a responsive web application featuring an intuitive front-end interface, enabling users to seamlessly browse and explore various products pages for detailed information.
- Crafted a user-friendly static shopping cart interface that empowers users to effortlessly adjust item quantities, remove products, and efficiently manage their selections.
- Tech Stack: **HTML, CSS, Bootstrap, JavaScript**

VideoVerse | Live | Code
- Engineered a dynamic and responsive web application similar to YouTube, enabling users to seamlessly search for, discover, and enjoy a vast array of videos, all within an intuitive interface.
- Implemented diverse pages utilizing React Router to enhance user experience and enable seamless navigation within the web application.
- Technology Used: **React JS, Tailwind CSS, Axios, RapidAPI.**

BANK'O'FY | Live | Code
- Collaborated on a team project to develop a cutting-edge web application that revolutionized the banking experience by providing customers with convenient access to a wide range of banking services from the comfort of their own devices, eliminating the need to endure long queues at physical branches.
- Contributed to the front-end development of the website, ensuring an intuitive and seamless user interface.
- Technology Used: **HTML, CSS, Bootstrap, JavaScript.**

SKILLS

Technical Skills: C, C++, HTML, CSS, Bootstrap, React JS, MySQL, Node JS, VS Code, Atom, Version Control Using Git, GitHub

Core Subjects: Operating System, Computer Networks, DBMS, OOPs, Data Structures and Algorithms

ACHIEVEMENTS

- Solved **400+** Problems on both LeetCode**(Link)** and GeeksForGeeks(**Link**).
- Participated in FinTech Hackathon organized by FES, NSUT and reached in the final round.
- Given many contests on CodeChef. Highest rating: 1189.
